

# Study on Energy Efficiency Standards for Domestic Refrigeration Appliances

*Final Report*

## Group for Efficient Appliances Working Group 106 - Club E<sup>n</sup>R

### Authors of the report :

Buhl-Pedersen, Preben	dk-TEKNIK	(Denmark)
Lebot, Benoît	ADEME	(France)
Michel, Pierre	LASH-ENTPE	(France)
Nascimento, Carlos	CCE *(1)	(Portugal)
Østergaard, Vibeke	DEA	(Denmark)
Szabo, Andrew	Auxirbat - ADEME	(France)
Trines, Ruud	NOVEM	(The Netherlands)
Van der Sluis, Sietze	TNO	(The Netherlands)

**March 1993**

\*(1) The Centro para a Conservação de Energia whilst not formally part of the study contract with the Commission, has been working closely with the study group and has given substantial help and assistance.

# Study on Energy Efficiency Standards for Domestic Refrigeration Appliances

## *Final Report*

### Table of contents

<b><u>Executive Summary</u></b>	Page 5
<b><u>Introduction</u></b>	Page 13
<b><u>Part 1 : Definitions &amp; General Considerations</u></b>	Page 17
1.A. Definitions	Page 19
1.B. Measurement methods for energy consumption of refrigeration appliances	Page 23
1.C. Refrigeration appliance categories & adjusted volume	Page 33
1.D. Review of existing standards and proposals for standards	Page 51
1.E. Influence of the CFC phase-out on energy efficiency in refrigeration appliances	
<b><u>Part 2 : The Refrigeration Appliance Market in the European Community</u></b>	
2.A. Saturation Levels for refrigeration appliances	Page 55
2.B. The major manufacturers	Page 59
2.C : Market shares of the competing brands	Page 60
2.D : Sales figures for the national markets	Page 63
2.E: Appliance sales categories	Page 64
2.F : Import/Export figures for domestic refrigeration appliances	
<b><u>Part 3: Definition of Short Term Energy Efficiency Standards</u></b>	
3.A : Collection of energy data on the EC refrigeration appliance market	Page 73
3.B : Description of the statistical approach	Page 79
3.C : Proposed equations for short term energy efficiency standards	Page 88
3.D : Impact of standards on nation appliance markets	Page 101

#### **Part 4 : Definition of Long Term Energy Efficiency Standards**

4.A : Methodology for definition of (long term) standards	Page 115
4.B : Description of design options	Page 121
4.C : Engineering analysis results	Page 131
4.D: Interpretation of life-cycle cost analysis	Page 149
4.E: Sensitivity analysis	Page 151
4.F: Recommended long term energy efficiency standard lines	Page 156

#### **Part 5 : Analysis of Impact of Energy Efficiency Standards**

5.A : Description of energy savings forecasting model	Page 167
5.B : Estimated energy savings due to implementation of standards	Page 171

#### **Part 6 : Proposal for an Administrative Procedure and Conclusions**

6.A : Introduction	Page 199
6.B : Measurements by Consumers' Organizations	Page 200
6.C : Alternative procedures for registration and inspection	Page 203
6.D : Possibilities for sanctions in case of nonconformity	Page 206
6.E : Conclusions	Page 209

<b>Appendix 1 : Additional comments on EN 153</b>	<b>Page 211</b>
<b>Appendix 2 : GEA's questionnaire</b>	<b>Page 221</b>
<b>Appendix 3 : Methods to select energy efficient appliances</b>	<b>Page 239</b>
<b>Appendix 4 : Derivation of linear equations</b>	<b>Page 245</b>
<b>Appendix 5 : The SPADE simulation model</b>	<b>Page 247</b>
<b>Appendix 6 : GEA Energy Savings Model (GEA-ESM )</b>	<b>Page 259</b>
<b>Appendix 7 : Environmental Impact Assessment</b>	<b>Page 277</b>
